Curtosity of curosities! One of the Wonders of the world!

This wonderful entriesity, which has created such an interest in all the large Cities of Europe, was invented by Tallesia Giberti of France. After being exhibited there for some time it was sent to London and placed on exhibition, where it was visited by Quoen Victoria and all her Court, including nearly every member of Parliament and many thousands of the populiace. While a former agent of P. T. Barnum was on a visit to Europe in Search of novelies, he heard of this great Work of Art. He at once visited the inventor and by offering a large sum of money obtained his consent to bring this great wonder to America, since which time it has been shown in the leading Cities of the United States to over 7,000.000 people.
